## Country Update FRANCE

- Hydrogen is now on the Government Agenda.
- Inter ministerial report on hydrogen-energy sector
- Industry and Government agree on 2020 - 2030 targets
- Significant progress in the Energy Sector (ENGIE, Total,..)
- Deployment of Hydrogen Vehicles is developing in Paris
- France 2030 goals: 600 stations (700 Bars) and 800 000 vehicles (700 Bars)

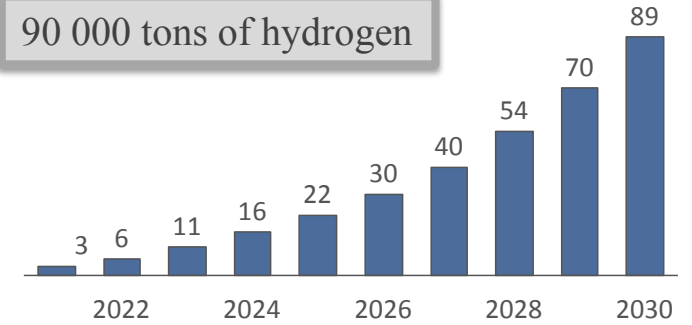

# French market foreseen in 2030

800 000 vehicles

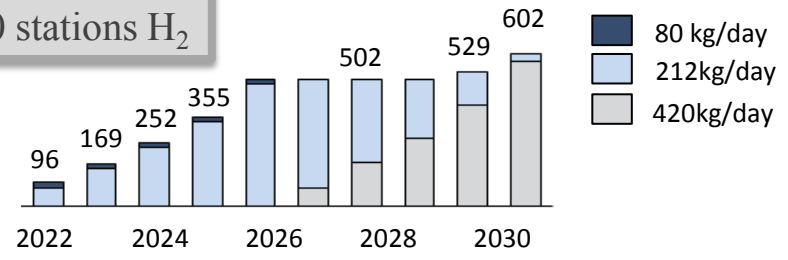

Number of vehicles H<sub>2</sub>, x1000

90 000 tons of hydrogen

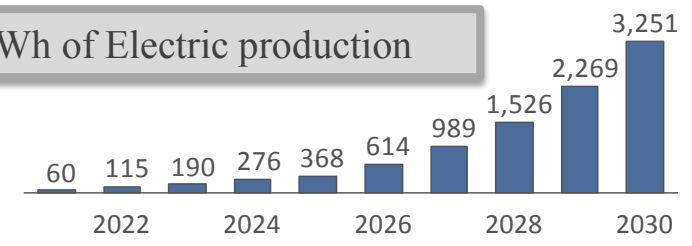

H<sub>2</sub> production tons x1000 per year

600 stations H<sub>2</sub>

Hydrogen Filling Stations H<sub>2</sub>

3 TWh of Electric production

Electricity used for Electrolysis, GWh per year

MINISTÈRE DE L'ENVIRONNEMENT,  
DE L'ÉNERGIE ET DE LA MER

## Inter ministerial report on hydrogen-energy sector

- Acceleration of innovations and progress in the Hydrogen energy vector is recognized. In particular in the domain of logistics and captive fleets
- Taking up the challenge for the French industry is of major importance
- The report recommends the Government to give clear political support to the Hydrogen sector by building a roadmap and an adapted governance.
- Call for proposal “*Hydrogen in the territories*” launched May 4, 2016 for large scale demonstrations:

# Hydrogen Taxis in Paris
