

# Japan's Proposal to IEA ETP2010

- IEA “Energy Technology Perspective (ETP)”
  - First issue: 2006
  - Now IEA is working on Next ETP for 2010 G8 Summit. Main innovative technologies are:
    - Decided:
      - (1) CCS
      - (2) Electric vehicle
      - (3) Solar power
      - (4) Sustainable cement industry
      - (5) Electrical grid
      - (6) Wind power
    - Under Consideration:
      - (7) Energy saving (zero emission) buildings
      - (8) Next-generation biomass (fuel)
      - (9) Next-generation nuclear power
- “Heat pump” technology is now picked up for (7) Energy saving buildings.  
Japan is also proposing “micro/small CHP and fuel cells” technology to be picked up for (7).
- ETP 2010 schedule:
  - End of 2009: Completion of the draft
  - May,2010: Publication of ETP 2010
